

# Article Galaxy Shopping Cart

Order Multiple Articles In Seconds, All In One Streamlined Workflow

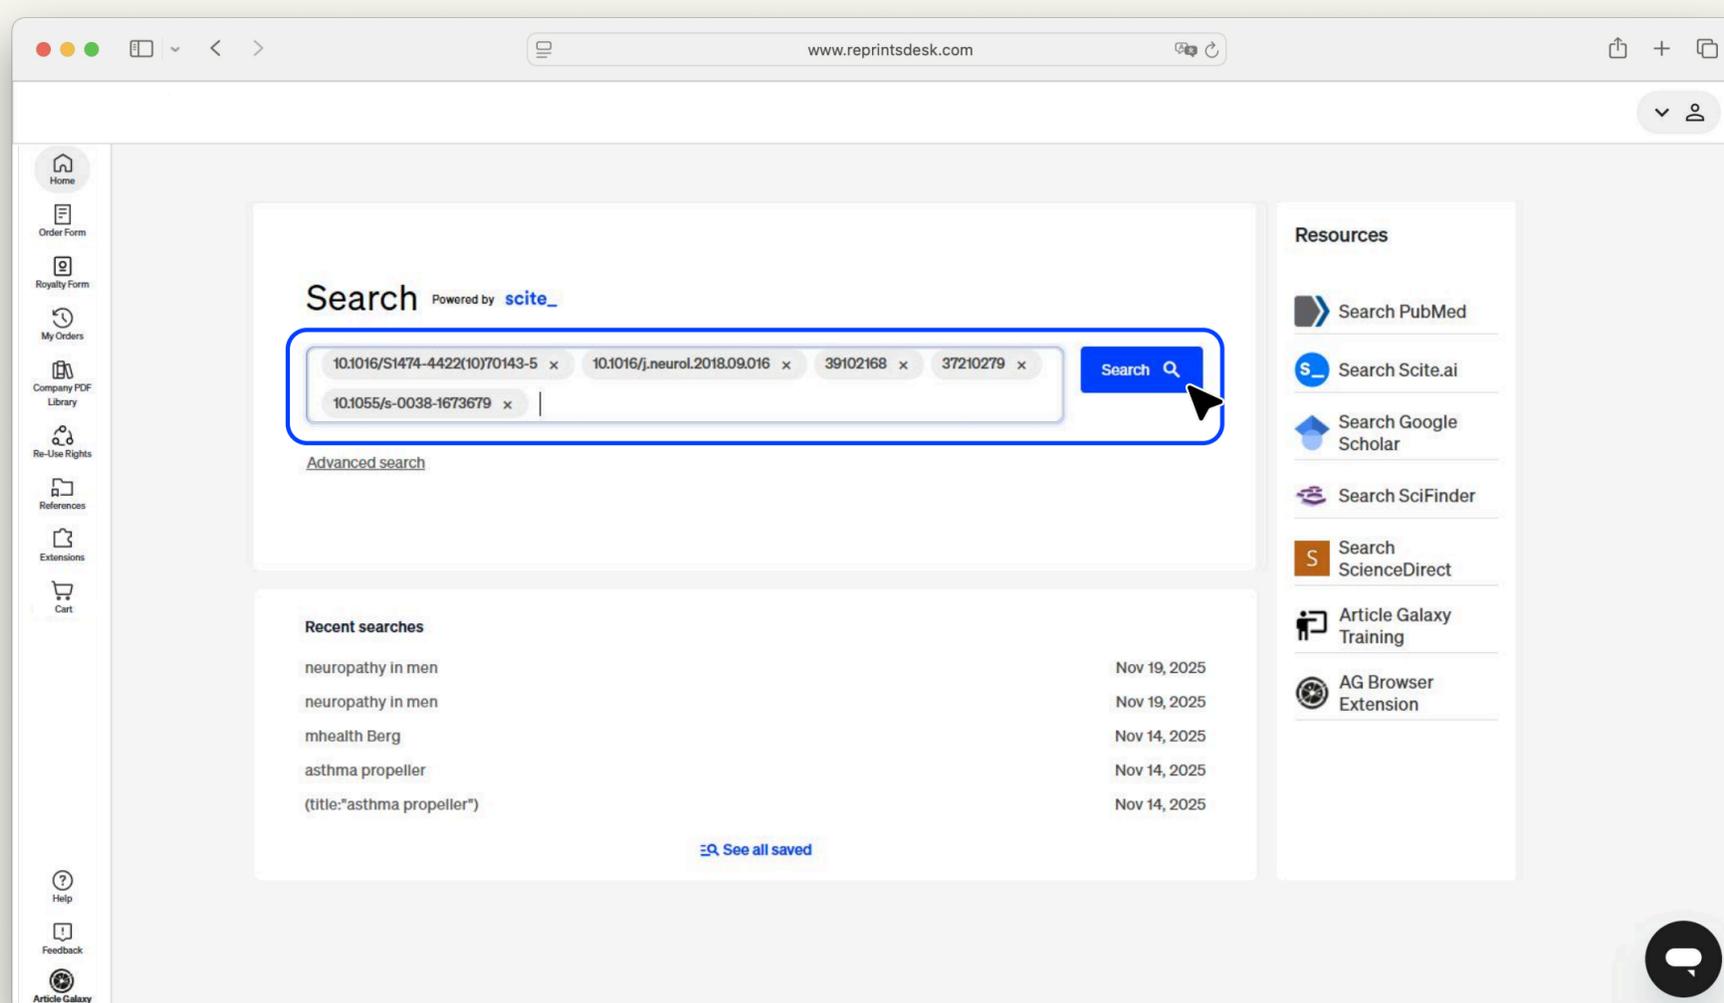

Stop ordering articles one at a time. Article Galaxy's Shopping Cart feature lets you add up to 50 articles to your cart at once, filter by intended use, and download PDFs together, transforming how you access and manage research literature.

## Two Ways To Add Articles In Bulk

### Paste Identifiers

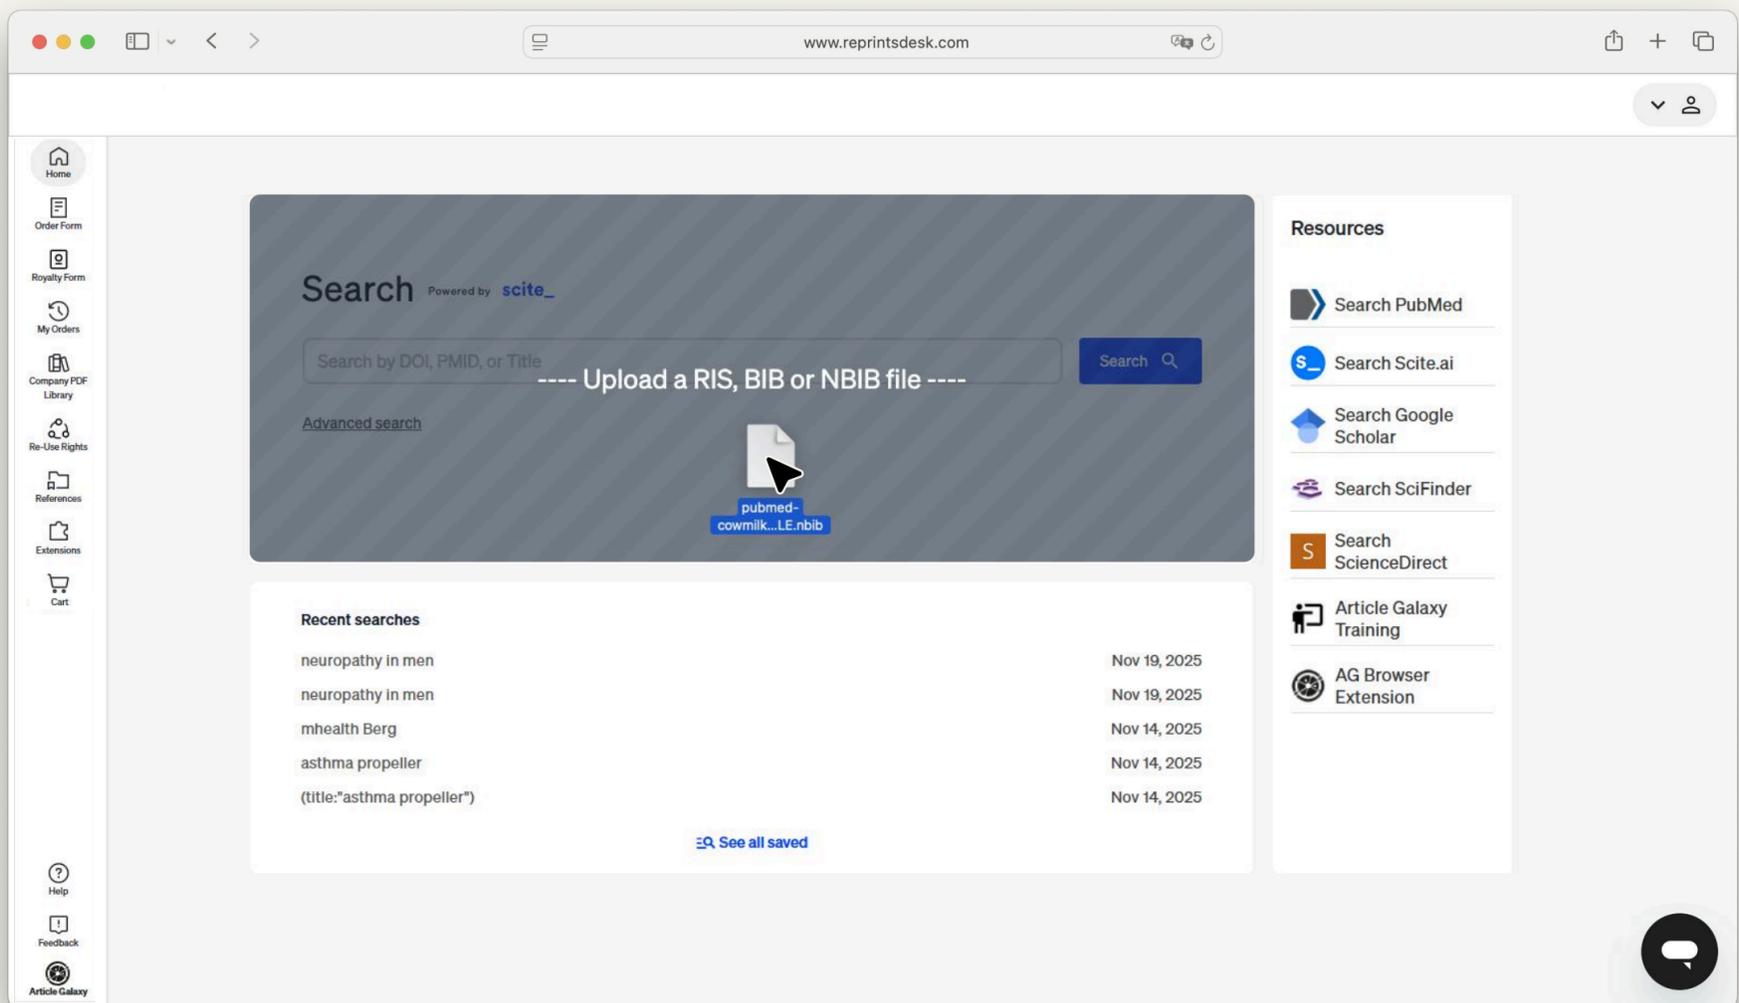

Simply copy and paste up to 50 DOIs or PubMed IDs into the search bar. Article Galaxy automatically recognizes and encapsulates each identifier with no manual formatting required.

Example identifiers shown as individual "capsules" in the search field

## Drag & Drop Reference Files

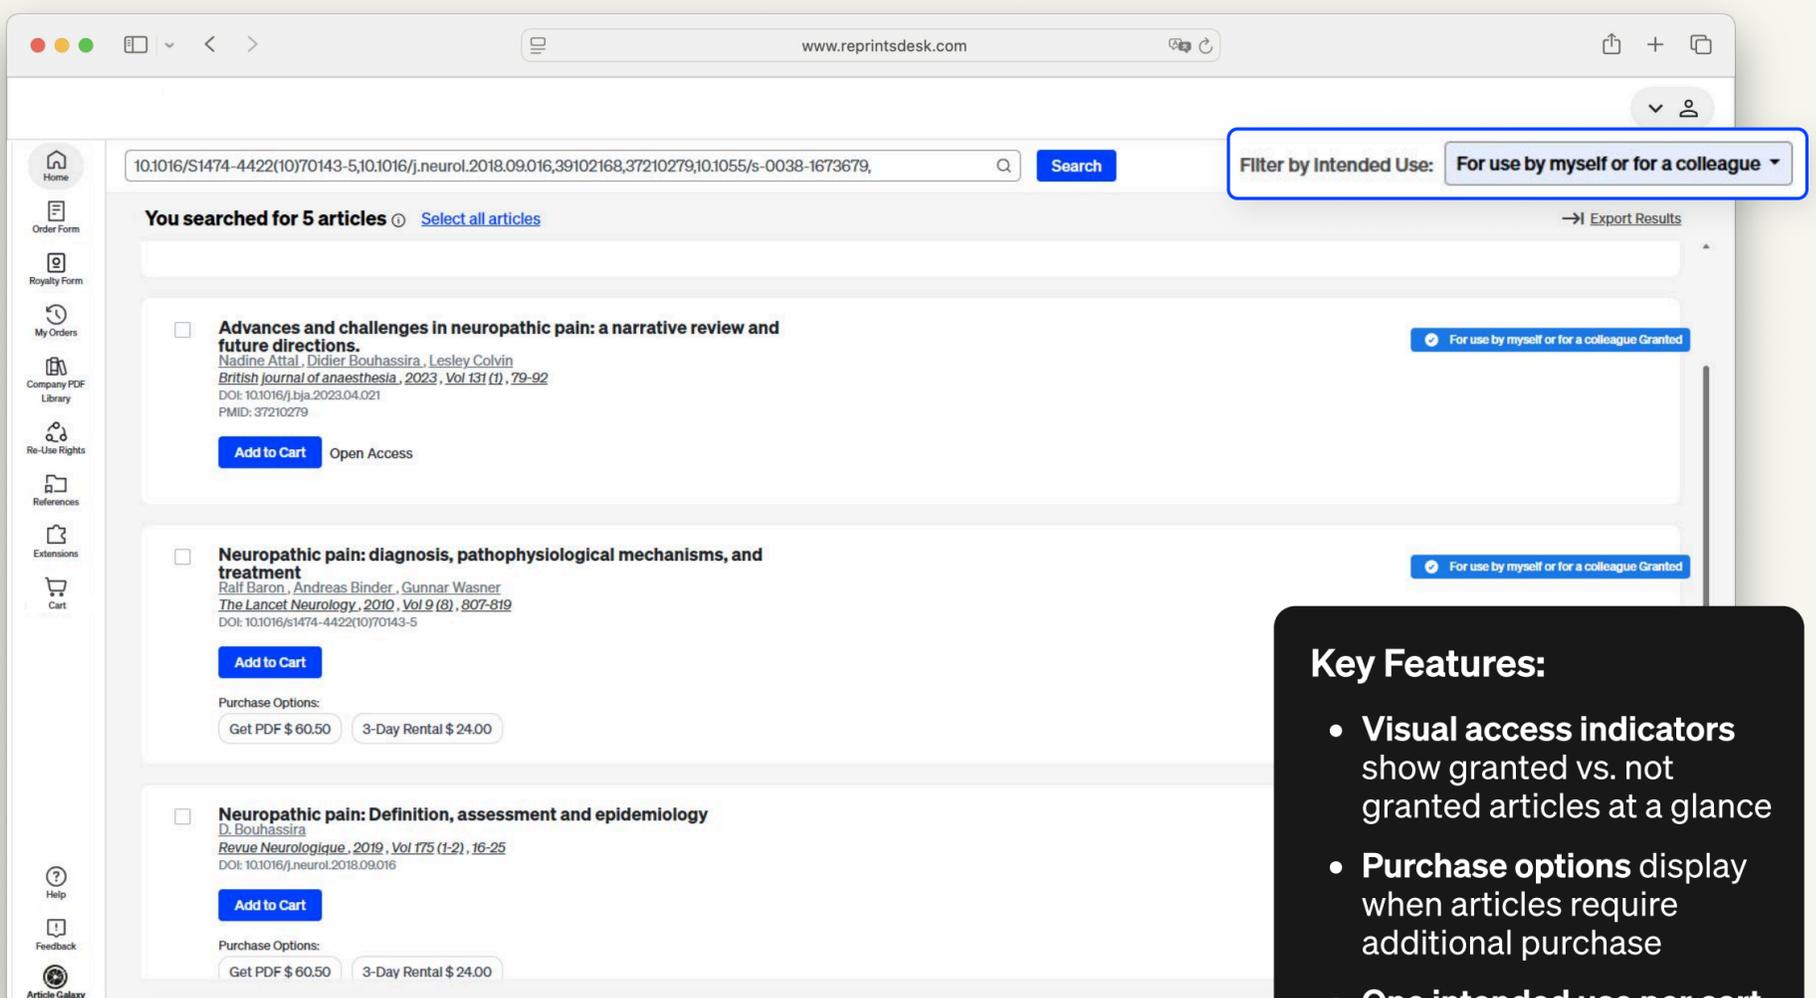

Upload reference manager files (RIS, NBIB, BibTeX) directly into the search interface. Your articles populate instantly, ready to review and order.

Supported formats: RIS, NBIB, BibTeX

## Smart Filtering By Intended Use

After searching, filter your results by intended use to see which articles are available under your specific access rights, all before adding to your cart.

### Key Features:

- **Visual access indicators** show granted vs. not granted articles at a glance
- **Purchase options** display when articles require additional purchase
- **One intended use per cart** ensures compliance with licensing terms

Account default for the "Filter by intended use" dropdown can be customized

# Build Your Cart

## Add Individual Articles

Click "Add to Cart" for any article in your search results. Articles remain in your cart as you continue searching.

# Review & Place Your Order

Before finalizing, review your complete order including delivery method, intended use, and cost breakdown.

The screenshot displays the ReprintsDesk website interface. The main content area shows a cart with 3 articles available for purchase. Each article entry includes a checkbox, the article title, author, journal name, volume/issue, page numbers, and DOI. Delivery options are shown as 'Get PDF \$ 60.50' or 'Get PDF From Open Access', with an 'Add to Reference Folder' button for each.

The sidebar on the right, titled 'Billed Now 3 Articles', contains a 'Place Order' button and an 'Order Summary' section. The 'Order Summary' includes fields for 'Delivery to' (javila@reprintsdesk.com), 'Intended use' (For use by myself or for a colleague), and 'My Reference:' (Please enter value). Below this is a 'Clinical Area (Area of Study):\*' dropdown menu. The 'Order Breakdown' section shows: Get PDF (1), Open Access (1), and AI Rights (1). The 'Estimated Total' is \$ 60.50.

## Order Details Include:

- Delivery method for each article (Open Access, Get PDF, etc.)
- Intended use confirmation
- My Reference field for internal tracking
- Clinical Area selection (if applicable)
- Order Breakdown showing access types and estimated total

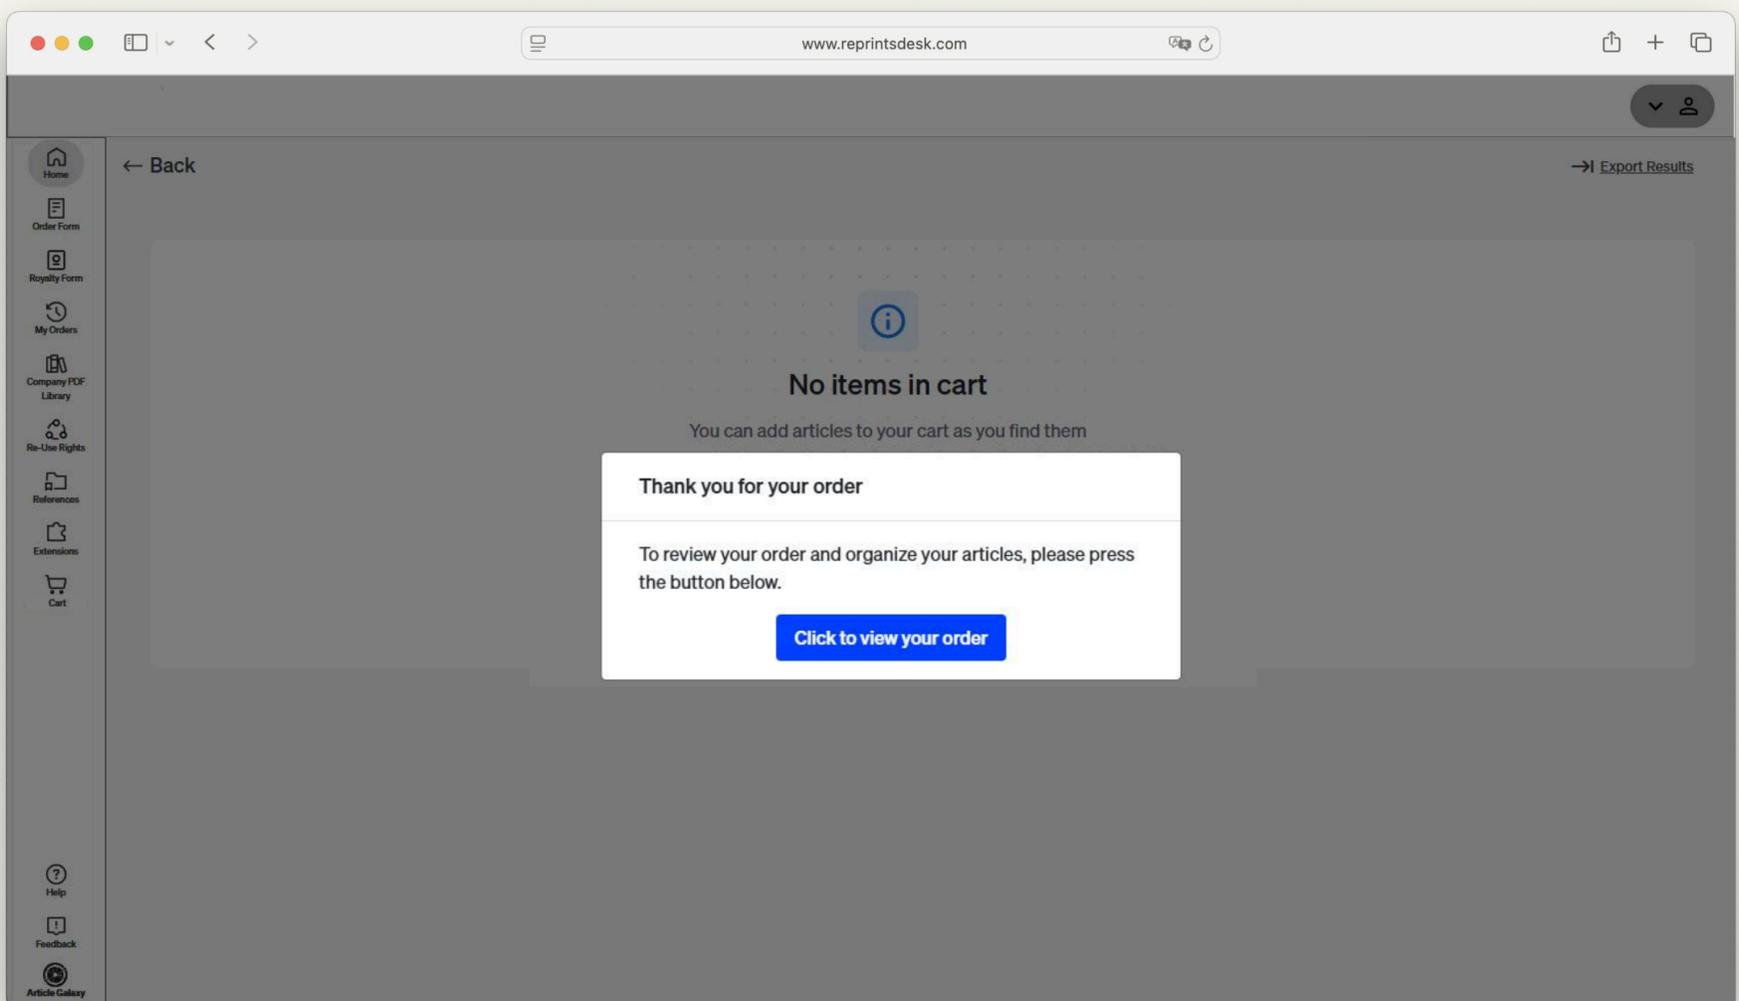

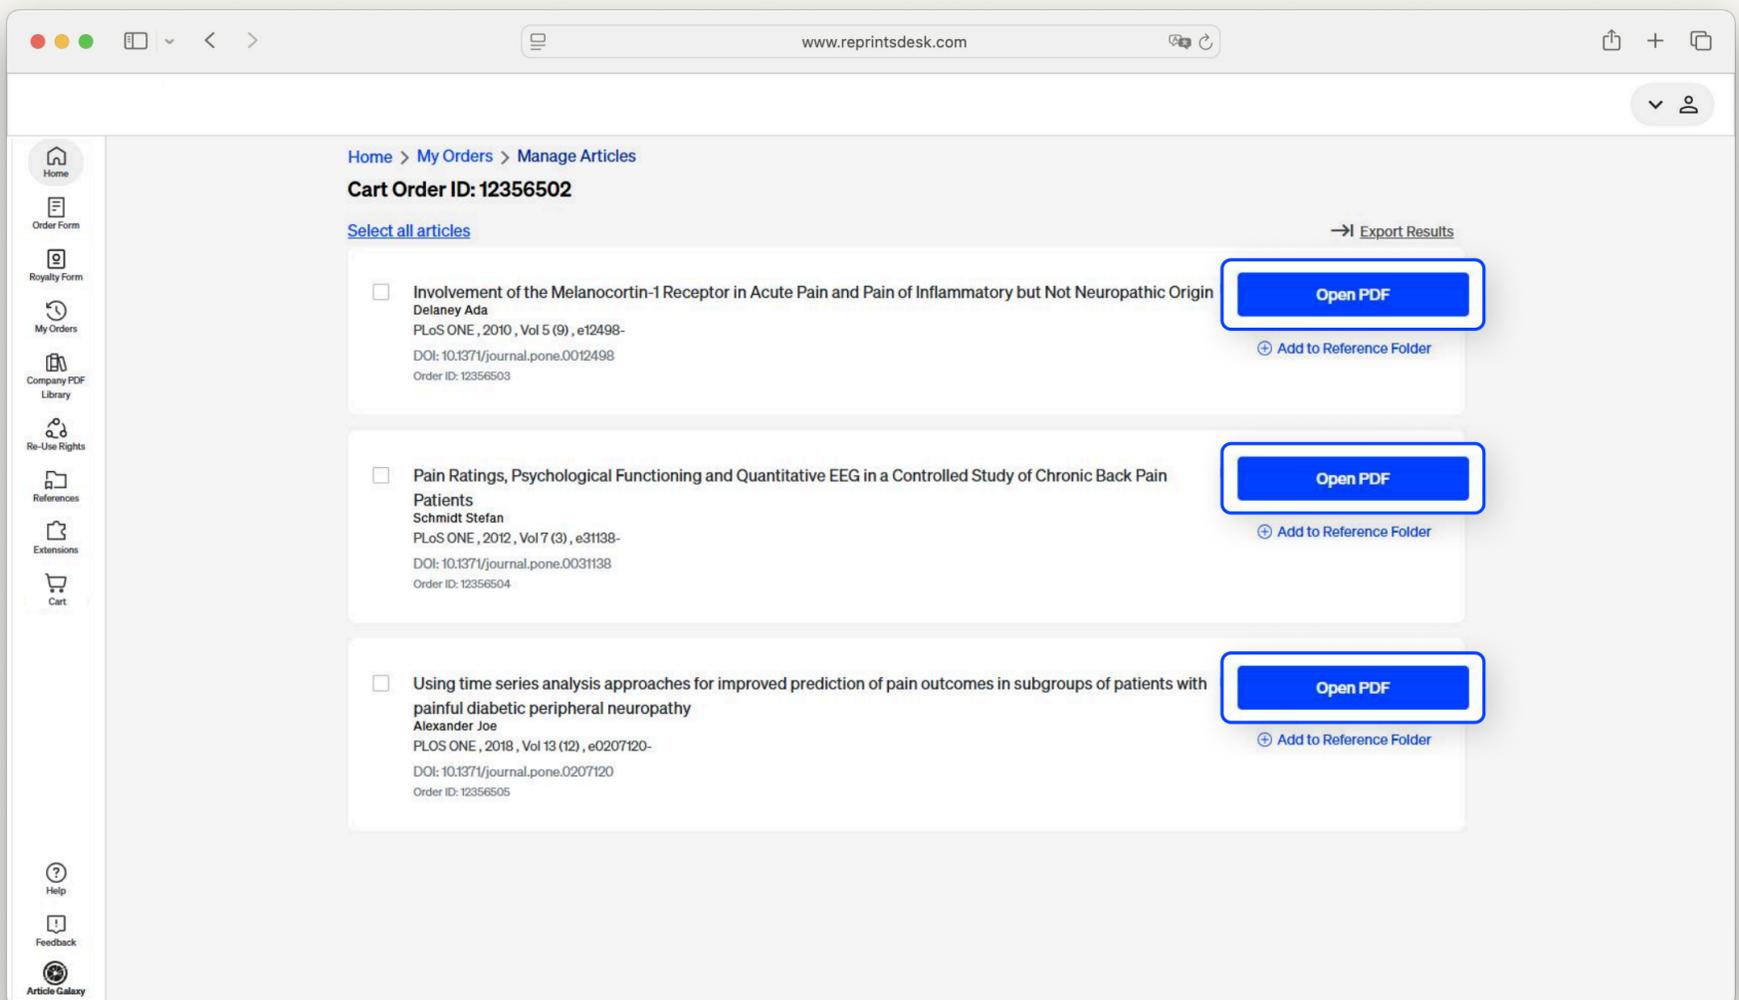

## One Confirmation Email:

Receive a single confirmation email per cart order with individual order IDs for each article which makes it easy to track and reference specific items with customer support.

# Instant Access To Your Articles

Once your order is placed, immediately available PDFs display "Open PDF" buttons for instant download.

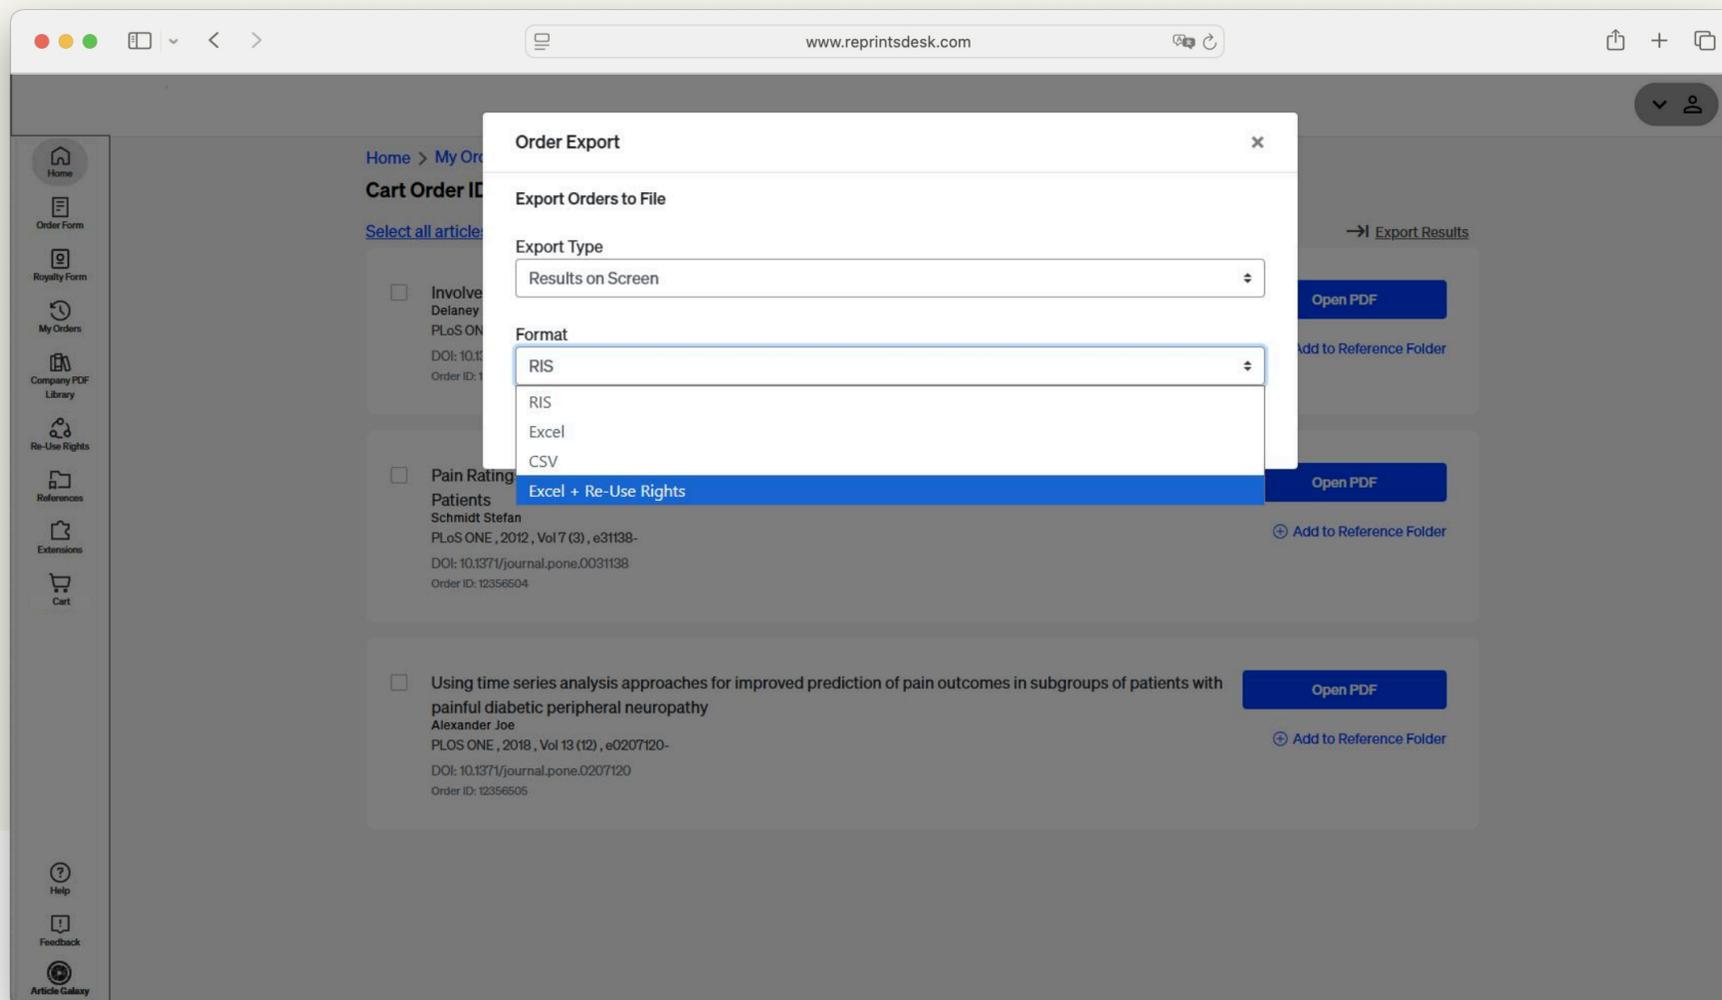

## Download Options

- Open PDFs individually as they become available
- Access your complete order through "My Orders"
- Save articles to Article Galaxy References folders

Note: Most articles deliver immediately; complex fulfillment requests may take up to 48 hours

# Export Re-Use Rights Data

For customers who license Re-Use Rights, bulk export rights information for all articles in your order to Excel or CSV format.

## Export Options

- **RIS** - Reference manager format
- **Excel** - Standard spreadsheet
- **CSV** - Comma-separated values
- **Excel + Re-Use Rights\*** - Complete rights data table

## Use Cases

- Organizational record-keeping
- Compliance documentation
- Rights verification across multiple articles
- Single source of truth for reuse permissions

\*Available only for accounts with Re-Use Rights add-on

## Key Benefits

- Save hours ordering multiple articles with streamlined bulk input
- Filter by intended use to ensure compliance before ordering
- Download PDFs all at once instead of one by one
- Export reuse rights for all articles in a single file
- Track orders easily with individual order IDs in one confirmation

## Getting Started

**Access:** Click the cart icon in your Article Galaxy navigation menu.

**Availability:** The Shopping Cart feature is enabled at the account level. Contact your Account Manager for configuration adjustments.
