

POWERING MODERN RESEARCH WORKFLOWS

Your AI Tools, Now Grounded In Research

How the workflow has changed - and what it means for your organization.

Traditional Workflow

AI-Driven Workflow

The Problem

AI assistants are not connected to trusted research infrastructure by default. Most pull from training data and open web sources - not your licensed literature. The result: hallucinated citations, no evidence transparency, and answers your team cannot trust.

The Fix

Scite's MCP layer connects AI assistants directly to verified scientific literature and citation intelligence - so your tools reference real, licensed evidence instead of generating answers from scratch.
