Article Galaxy Scholar

Bringing Users back to the Library

Built specifically for the needs of academic libraries and their users, the Article Galaxy Scholar platform provides a cost-effective and time-saving solution to supplement existing subscriptions and interlibrary loan needs. More than just a means for quick and reliable document delivery, this online software platform lets you manage user access to selective journals and publishers, from anywhere in the world, without additional staff time. Best of all it gives you the administrative tools and reports you need to give you real-time insight into what matters most.

Features Include:

- Robust Open Access filters
- Smart customization options
- Integration with existing library systems

The Academic Collection powered by Reprints Desk enables on-demand access to articles, even when your institution does not have an existing subscription.

100% high quality PDF articles delivered in minutes
....
40,000 journal titles
....
Integration with library loan software (ILLiad, RapidILL, IDS)
....
Works with any link resolver (SFX, Alma and EBSCO)
....
Special Academic Rates

Get Started Today

We've worked with hundreds of enterprises to deploy our Article Galaxy service, and **we are here to help** you too–regardless of complexity, scale, or budget.

Ensure Continuity of Access: Just-in-time, all-the-time. Give your patrons easy access to the articles they need to do their best work, while reducing ILL workload. Take away the stress and uncertainty of guessing what patrons need ahead of time. Your users will have a guaranteed pathway to access, with no dead-ends.

Give Users Access in Minutes: Faster is better. Know that articles can be delivered quickly to the requester's inbox. No more additional administrative time spent on trying to locate and verify whether an article can be obtained.

Make Smart Data-Driven Decisions: Reduce the guesswork on budgeting and forecasting. Summary reporting enables you to make better, more informed decisions to plan and validate your expenses. Get insightful information with real usage data—by user, title, publisher, open access and delivery method.

Customize for Your Unique Needs: Whether you're a small or large academic institution, customization options allow you to configure user, journal, publisher, and purchasing settings to fit your processes and existing access options. This allows you to manage control and access so you're not surprised with additional charges or access to content you did not intend to provide.

Get to Know Your Users Better: Recognize and support previously unidentified heavy users. Notifications give you timely information on usage and when preset threshold limits have been reached.

Prioritize Open Access: Removing barriers to open access. Take advantage of Open Access prior to sourcing your article elsewhere. Our robust open access filters ensure you don't pay for an article that is already publicly available.

Invest in Long-Term Savings and Efficiency: Provide access where it matters most rather than provide access just for the sake of access. Only pay for the articles you need for the users who really need them. This enables a more strategic way to stay on budget and control spend.

Academic Collection + Article Galaxy Scholar =

Your **Unmediated Solution** to Expanding Your Library Subscription

Just Set it and Forget it.

Welcome to better content delivery.

Content and Insight in one. A system that works for you, and with you.
