

Article Galaxy Premium

The Full Research Platform: Discovery, Delivery, Access, & Rights In One Place

Some teams need articles. Research-intensive organizations need to organize, share, mine, and reuse them, and to prove they have the rights to do it. **Article Galaxy Premium** brings document delivery, reference management, re-use rights, and AI and TDM compliance into a single platform, so your researchers spend their time on the science instead of stitching tools together.

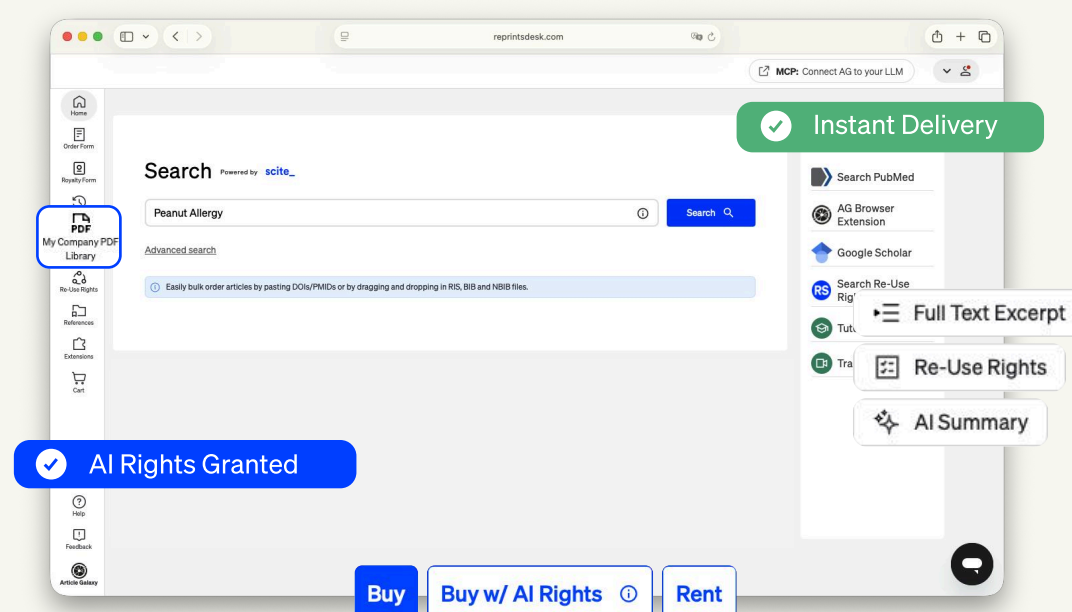

Why Teams Choose Premium

- Prove compliance at scale: re-use and AI/TDM rights verified at the article level, with an audit trail behind every permission.
- Cut operational load: automated fulfillment removes manual steps from high-volume document requests.
- Get researchers to full text faster: PDFs arrive with supplementary material attached and formats already consistent.

Includes The Full Functionality Of Article Galaxy

In the Article Galaxy ecosystem, you can:

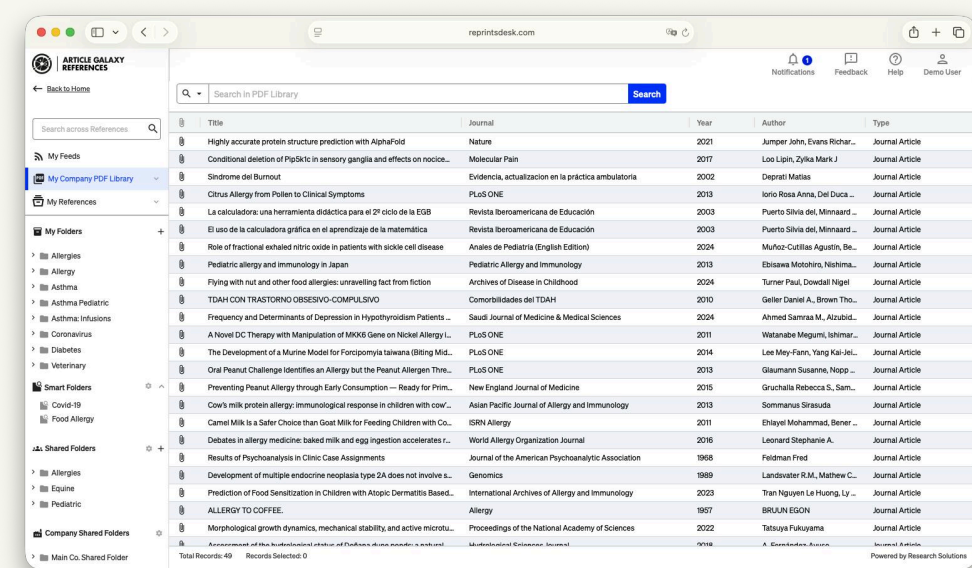

- All content delivered copyright-cleared, including material never published digitally
- Open Access filtering that surfaces free content before paid options
- A company PDF Library with duplicate detection
- Bulk order up to 50 articles with the shopping cart
- Subscription and token integration
- Article rentals
- Built-in Scite search for discovery
- Full admin visibility into usage and spend

What Premium Adds

Article Galaxy References

A full reference manager built into your discovery and access workflow. Build libraries, collaborate on literature reviews, and open full-text PDFs in one interface, tightly coupled to Article Galaxy's delivery engine and your PDF Library, with folder sharing across your whole team.

Re-Use Rights

Verify how each article can be shared or reproduced before it goes into a presentation, regulatory submission, or internal report. See Open Access and Creative Commons rights alongside your own directly negotiated publisher rights, all at the article level, with bulk searching by DOI or PMID and CCC and CLA integration, so compliance checks happen inside the workflow.

AI & TDM Rights Workflows

Know which articles in your library carry TDM and AI-compatible licenses, manage rights requests with publishers, and keep an auditable record of permissions. Your text mining and AI programs stay compliant as they scale.

Auto PDF Delivery

Touchless fulfillment that draws first on the subscriptions and tokens you already hold. When a researcher or system requests an article, the PDF arrives without manual handling by library staff or information specialists, and without paying twice for access you own.

Supplementary Material Delivery

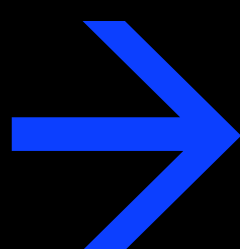

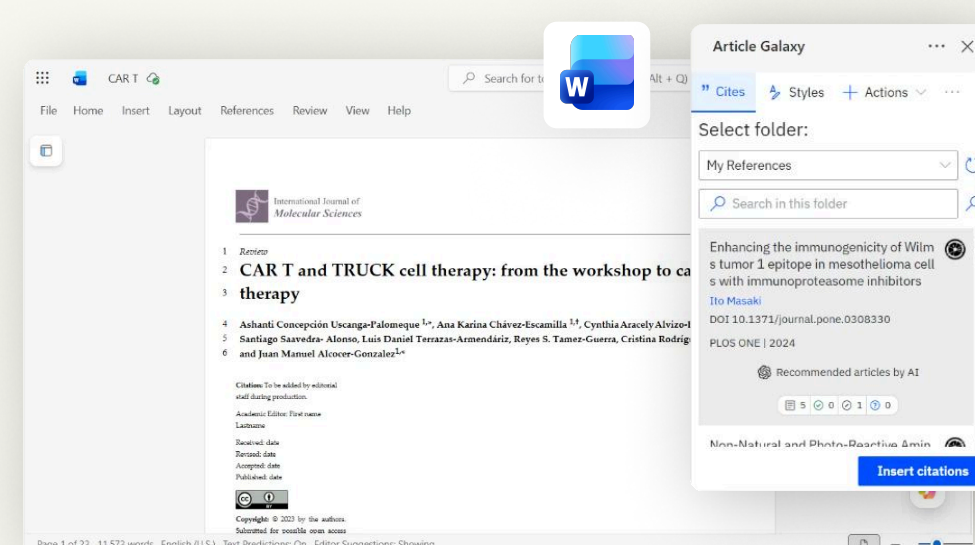

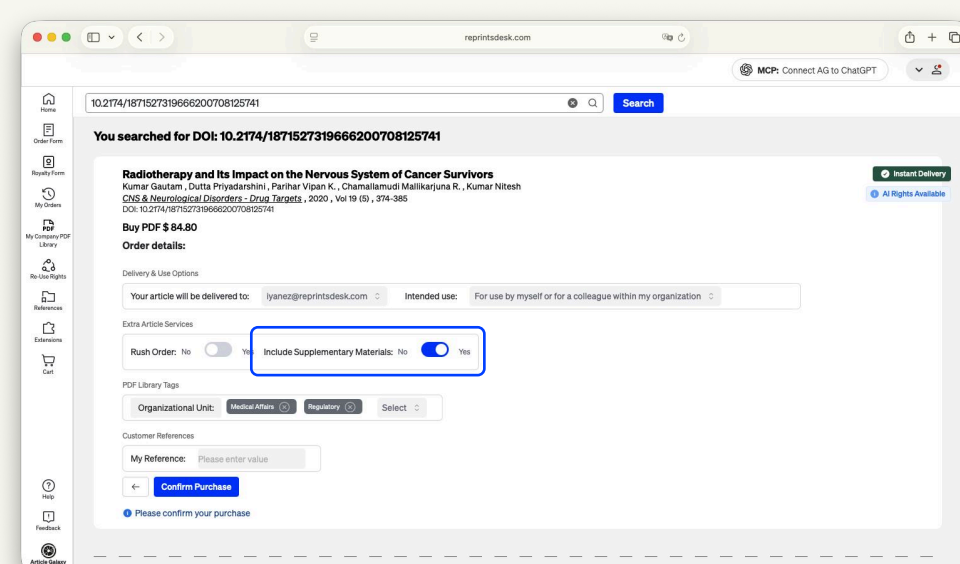

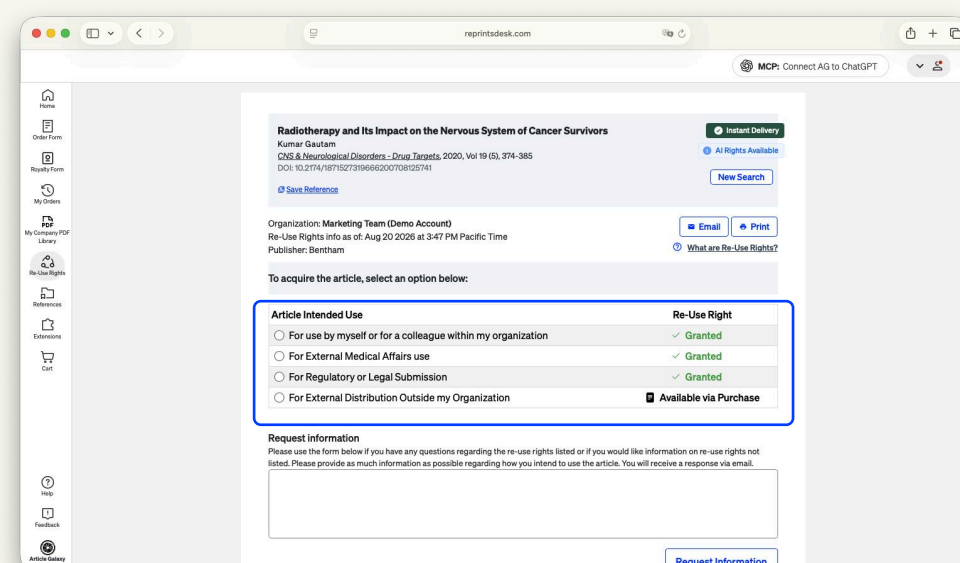

Datasets, appendices, protocols, and supporting figures arrive alongside the article and land in your order history and PDF Library, giving you a true system of record. Researchers reproduce experiments and validate findings without chasing down files.

ePub Replacement

When publishers supply e-pub or other non-PDF formats, Premium automatically substitutes clean, publisher-quality PDFs, so your library stays current, consistent, and complete.

Work In Your Existing Tools

Reach Article Galaxy without leaving your workflow. Search, buy, rent, or access articles straight from PubMed, Google Scholar, and 80+ other sites with the browser extension, and cite as you write in Microsoft Word with 10,000+ citation styles.
