RESEARCH SOLUTIONS REPRINTS DESK

Corporate Fact Sheet

About Research Solutions/Reprints Desk

Research Solutions/Reprints Desk (OTCQB: RSSS), is a pioneer in cloud-based research intelligence and retrieval solutions for R&D-driven organizations. We help our customers create and speed discoveries, save time and money, and remain copyright-compliant.

Founded in 2006 by visionary entrepreneur Peter Derycz, the company started out by providing hard-copy medical reprints and delivering print journal articles on demand. In 2017, to meet customers' evolving needs, the company shifted to a business model focused on electronic document delivery—and sold the medical reprints portion of the business.

Today, **Research Solutions/Reprints Desk** is a leading SaaS provider—powering **Article Galaxy**, the world's most popular document retrieval engine and research platform.

We aim to simplify the way research is traditionally done by making access to full-text scientific literature and intelligent data insights, time and cost effective. The company's award-winning article delivery solution, powered by an ecosystem of research tools and unparalleled 24/7 customer support, makes **Article Galaxy** the top choice for R&D organizations and academic institutions for fast access to journal articles, patents and other content in scientific, technical and medical (STM) research.

Our dual company name, **Research Solutions/Reprints Desk**, represents our relentless commitment to progress and innovation, along with an homage to our early beginnings.

For Enterprise

Article Galaxy Enterprise: Customizable cloud-based platform that provides an all-in-one literature acquisition and management solution that offers fast access to scholarly content, including over 80 million journal articles, hard to find print copies, book chapters and other STM content.

Bibliogo: Literature management solution with built-in collaboration tools, centralized PDF management, automated RSS and TOC alerts and cite and write functionality.

Article Galaxy Widget: Browser plug-in that transforms search results from over 80+ discovery websites, including Google Scholar and PubMed into your personal shopping cart, adding an overlay of additional information including Altmetric attention scores.

For Academia

Article Galaxy Academic Collection: On-demand document delivery service that provides academic institutions access to over 40,000 journals and 400,000 book chapters as a means to supplement their existing collections.
