

Your reference management workflow is about to get a whole lot better! With **Bibliogo**—your all-in-one solution for enterprise level literature management—you can seamlessly search, acquire, organize, share and manage content. Available as an Article Galaxy Add-On, Bibliogo includes robust PDF library management, integrated literature search, table-of-contents, RSS and ATOM feeds from multiple publications and database, and native integration to Article Galaxy for lowest-cost acquisition filtering and on-demand document delivery.

Available Through Your Article Galaxy Account

1. **Log in** to your Article Galaxy account at www.researchsolutions.com or via your company's SSO
2. Click on Bibliogo under the **Resources** Links section of your home screen

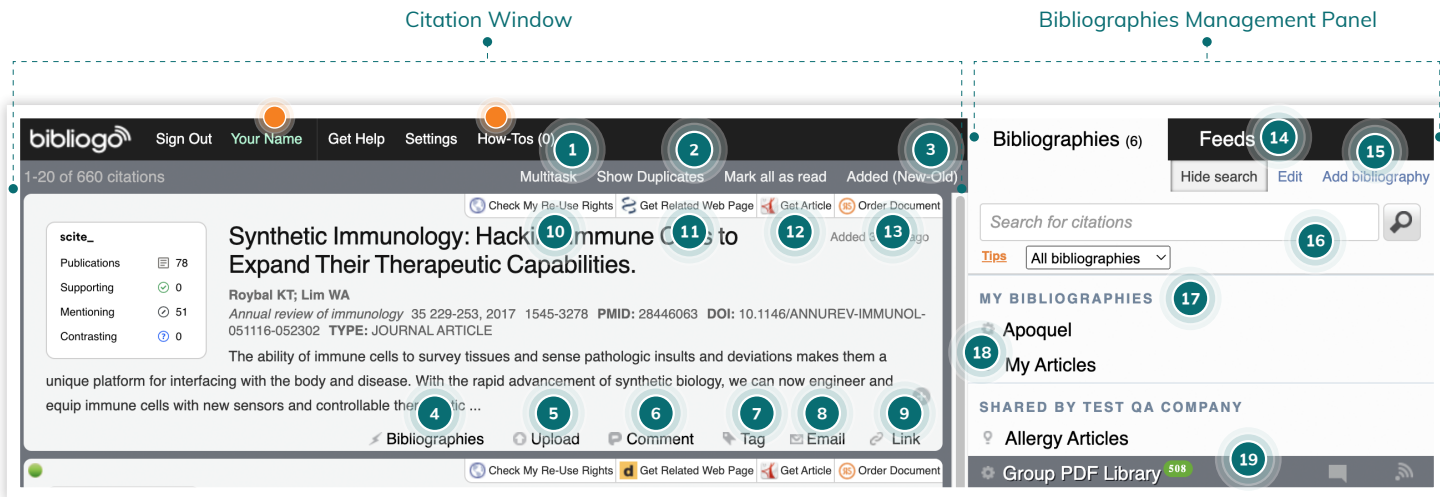

The screenshot displays the Article Galaxy user interface. On the left is a dark blue sidebar with the 'ARTICLE GALAXY' logo and a navigation menu including Home, Order Form, Royalty Form, My Orders, Your Company PDF Library, Re-Use Rights, and Apps. The main content area features a search box with the prompt 'Find an article by DOI, PubMed ID or search terms.' and a 'Search' button. Below the search box are examples of search terms and an 'OR' separator, followed by a 'Use the order form' button. On the right, a 'Resources' section lists various search services: Search PubMed, Search Google Scholar, Search Dialog, Search SciFinder, Bibliogo: Citations & Alerts (highlighted with a green circle and the number 2), and Article Galaxy Widget. The top right of the interface shows 'YOUR LOGO HERE', 'Notifications', 'Get Help', and 'Demo User'.
