

You've created your bibliographies in Bibliogo. Now it's time to take your literature search, acquisition and management to the next level! Here are some of the simple yet powerful tools you have at your fingertips.

Click **Order Article** to order and obtain one copy or multiple copies of an article.*

View abstracts, altmetric scores, related pages and availability.

Check **My Re-Use Rights**: This will link to your copyright reuse information or internal copyright policy.

Search by keyword or by query.

Click on **'Tips'** under the search box to view syntax and search queries to drill down.

Bibliographies: Select articles and add them to any bibliography.

Upload: Upload a file, share with bibliography members, and check reuse rights.

Comment: You can use this to add comments and collaborate around an article.

Order: This will help you to order directly from the article view. Simply type in your delivery email and expect full-text access in minutes.*

Tag: Start typing and click on the recommended Tag. You can also search tags by using this syntax "tagList (text)" in the search box.

*This button may not be available in customized configurations.

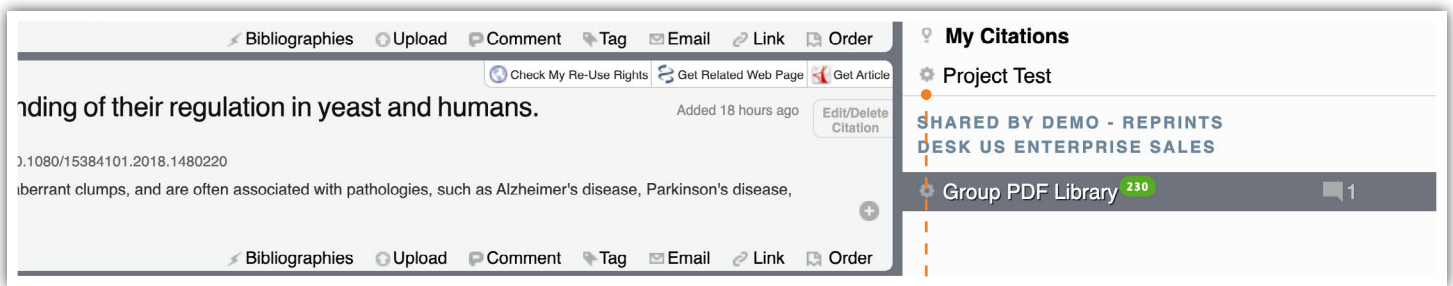

'Get Article' or 'Get File' means you already have access to the full-text PDF.

Manage Multiple Articles All at Once

Open the **Multitask** tab on the toolbar to select multiple articles, then choose your desired management option.

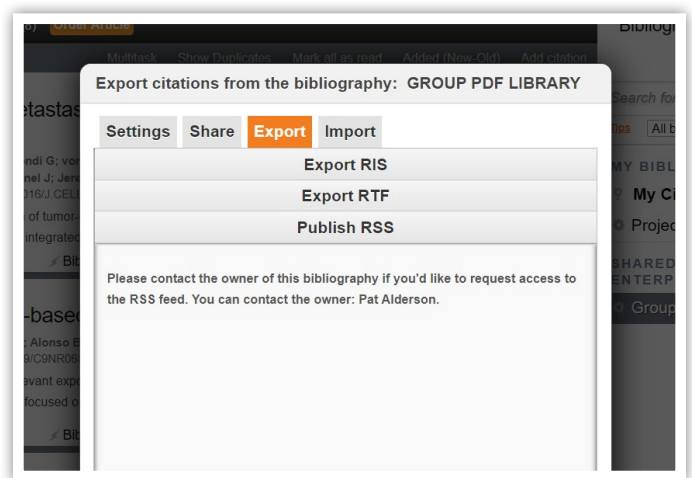

Disseminating Bibliographies and Citations

Send an **email** or **link** to share this citation to anyone within your organization, allowing them to read and comment on the article.

Click on your **bibliography settings** and share via email; export the whole bibliography via RIS, RTF or Publish RSS; and create excel reports for bibliography owners.
