

Unlock the Benefits:

Upgrading from FIZ Standard to Article Galaxy

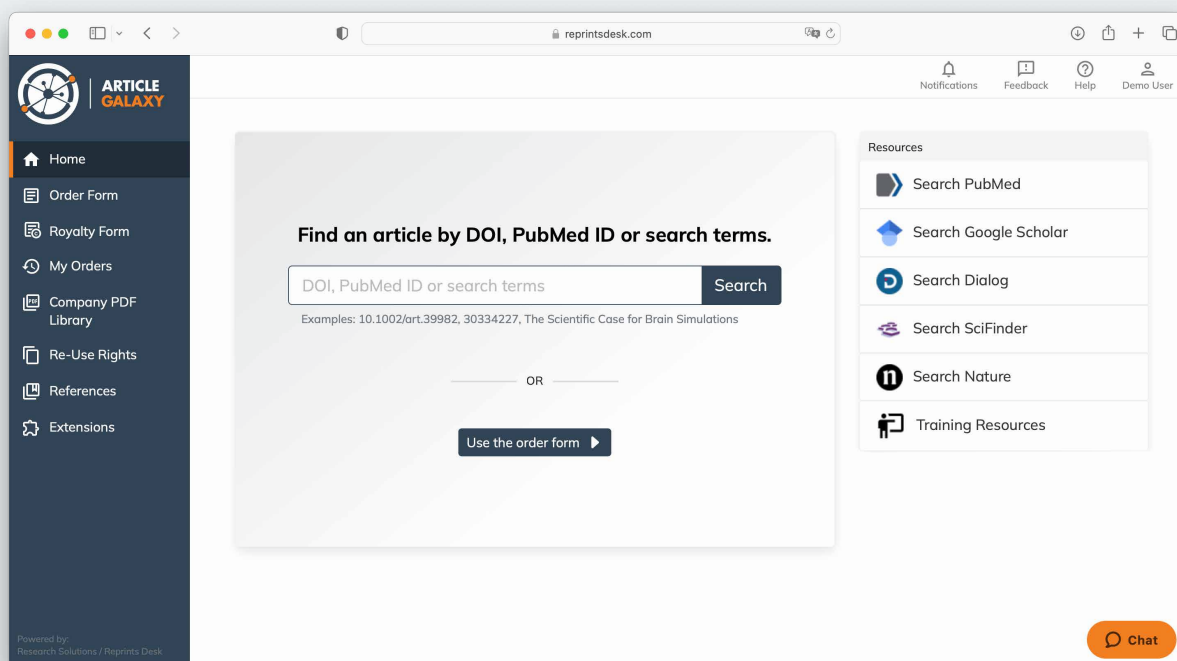

Since 2022, Research Solutions has partnered with **FIZ to seamlessly transition FIZ's** document delivery customers. This collaboration ensures that esteemed customers enjoy uninterrupted access to prompt, dependable, and legally compliant full-text document delivery.

We are looking forward to assisting each and every one of you and will continue to offer support with round-the-clock customer support and a global team ready to help.

Article Galaxy: Your All-In-One Platform for Accelerated Research

At Research Solutions, we support research-intensive organizations to power innovation and results. We deliver true enterprise search capabilities and effective knowledge management.

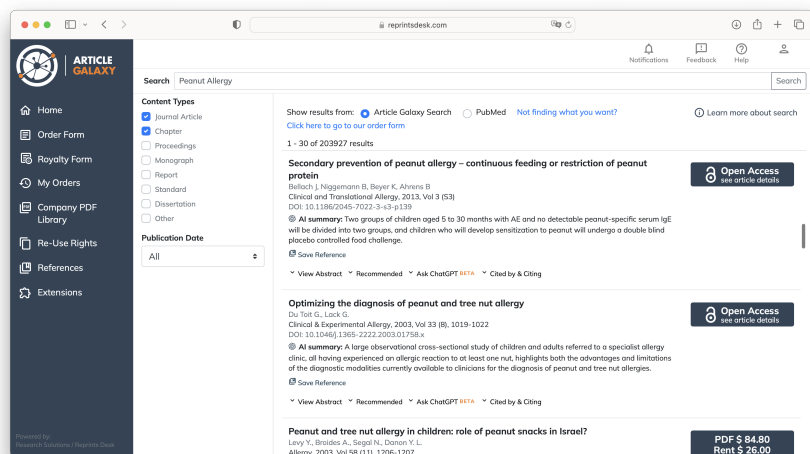

As part of this partnership, FIZ customers will have the exclusive opportunity to upgrade to Research Solutions' comprehensive Article Galaxy platform. Tailored to fit the unique needs of your organization, an annual Article Galaxy Platform License empowers you to design a customized research workflow that guarantees superior outcomes. With minimal resources, you can achieve remarkable time and cost savings.

Why Upgrade to Article Galaxy?

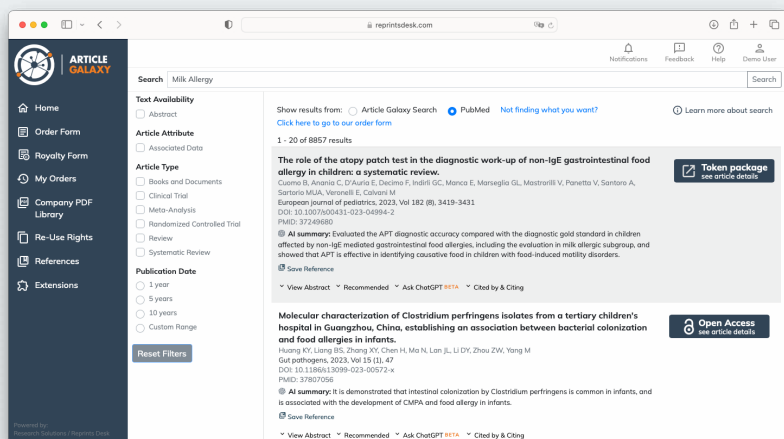

Best-In-Class Full-Service Document Delivery Service

Article Galaxy makes it easy for your entire organization to access copyright-compliant documents with lightning speed. Our powerful document retrieval engine grants instant access to over 200 million peer-reviewed articles, conference papers, book chapters, and other scholarly content. We take the hassle out of finding information and simplify document delivery, helping researchers leverage top-quality content resources and maximize the value of scientific literature by saving time and cutting costs.

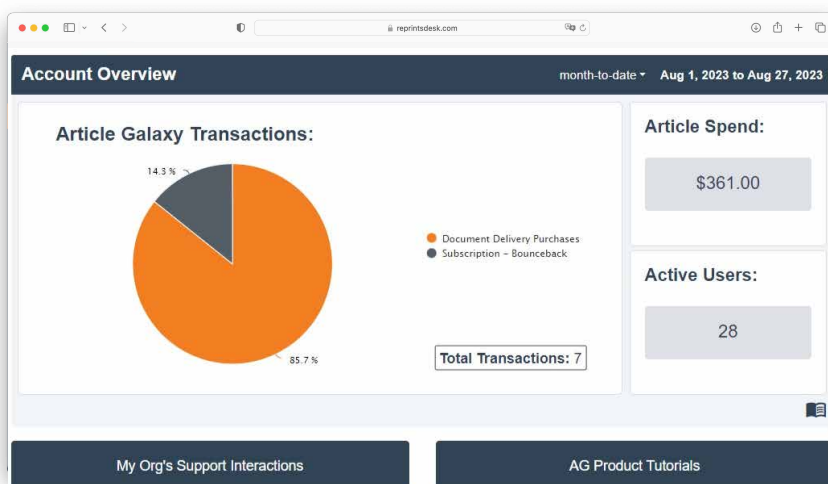

Integration with Subscriptions and Tokens

These integrations ensure that all Company-Wide Subscriptions and Publisher Tokens are effectively leveraged. With automated filtering, users are directed to the right subscriptions when they request specific items, optimizing your organization's subscription utilization. Similarly, Publisher Tokens offer additional protection to users, ensuring they can access and obtain articles that are a part of administrators' purchase bundles or packages without having to purchase them, thus saving more of users' departmental budget.

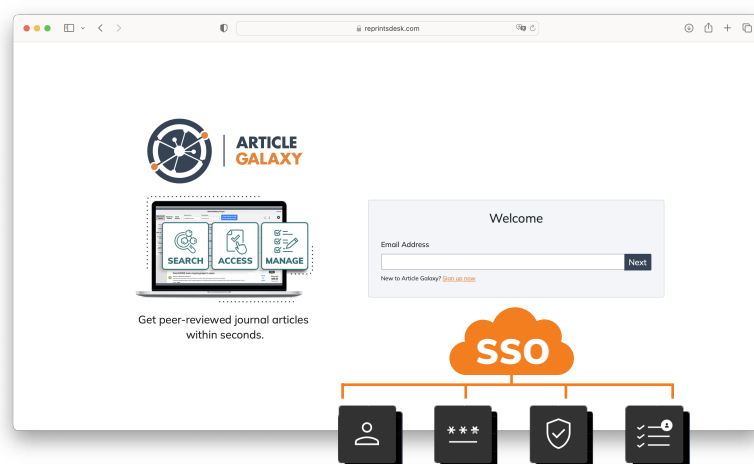

Comprehensive Reporting and Metrics for Administrators

Our robust administrator portal allows for easy access to detailed insights about their organization's literature acquisition, usage, and overall knowledge management operations. Administrators can track the number of active users and how your users are accessing articles on the platform. They can also gain quick insights into article spend to better understand how our platform maximizes the return on investment for compliant scientific literature.

Enhanced Authentication Options

Article Galaxy provides a range of secure authentication options. Our platform offers convenient self-registration and a seamless single sign-on (SSO) feature. This benefits users by guaranteeing a secure and faster login process and ensuring secure and efficient content search and retrieval mechanisms. At the same time, our SSO feature simplifies access management for administrators.

Start Enjoyvving the Benefits of Article Galaxy Today!

For years, the **Research Solutions Team** has served our clients as a trusted partner providing cloud-based workflow solutions to accelerate research for R&D-driven organizations. We navigate the ever-changing landscape to bring you the most cost-effective options year after year and ensure your success and streamline your research processes.

For existing customers interested in learning more about our advanced features, contact your dedicated Account Manager. If you're unsure who your Account Manager is, simply email our customer support team at customersupport@reprintsdesk.com and we will happily assist you.

A screenshot of the Article Galaxy interface. The top section shows a search bar and a 'YOUR LOGO HERE' placeholder. Below this is a table of journal articles with columns for Title, Year, Author, and Type. The table lists various articles from different journals, including 'Diagnosis and Classification...', 'Morphological growth dynam...', 'Assessment of the hydrolog...', 'Do-it-yourself Usability Eval...', 'Accessibility Testing', 'Peanut allergy? Recurrence...', 'A Chinese herbal medicine...', 'Assessing patient safety...', 'Targeting reactive nitrosid...', 'Emerging drugs for the treat...', 'Dark user interface, dark beh...', 'Usability-Glosser mit Usabili...', 'Usability and Usability Testi...', 'The scientific indication of...', 'Peanut Allergy testing: recent...', 'Misreading in oncology', 'CRISPR/Cas9 Editing of Mut...', 'A Note on Combining Ability...', 'Peanut allergy, anaphylaxis, a...', 'Efficacy and safety of oral th...', 'Selective Peanut Allergy A C...', 'Astronomy: Record-breaking...', 'Galaxy group around giant ra...', 'Managing Cross-Reactivity in...', 'Current Trend in Immunoth...', 'M216 ACQUIRED PEANUT SE...', 'Peanut anaphylaxis', 'Management of Peanut Allergy', 'Peanut Allergy: Changes in D...', and 'P331 Risk of new guidelines...'. The table is sorted by Year in descending order.
